Abstract (en)  
[origin: WO2006029847A1] The invention relates to a coaxial connecting part which is used to connect a coaxial plug socket (2, 3) to a circuit carrier (4) in the internal conductor (9). An elastically flexible bellow (11) made of a conductive material is incorporated therein in order to keep axial and radial forces, occurring at the beginning of the socket, away from the substrate.
