Abstract (en)

[origin: EP1790472A2] A printing machine has frame (11) and at least one plate printing drum (5) extended along longitudinal direction axis line (L). The printing drum has drive arm that rotates predetermined portion of lock bar. An actuator (51) is provided in printing machine and supported by the frame. The actuator moves roller (57) between contacting position and non contacting position with respect to drive arm.
