Abstract (en)
The method involves attaching an outlet device (20) in an outer section (18) under an aseptic condition in a clean room in such a manner that a substance for an enteral nutrition can arrive after leaving peel joint from a filling space to the outlet, and the substance can be taken from a plastic bag. The outlet device is heat sealed with the outer section. A portion of the outer section is removed before or after attachment of the outlet device. An independent claim is also included for a plastic bag which is produced according to the method for producing the plastic bag.
