Abstract (en)
[origin: EP1790879A2] A manual transmission includes a shift and select shaft (12) supported by a housing and reciprocable in an axis line direction and a rotational direction, an outer lever (13) fixed to a first end of the shift and select shaft at a base portion thereof, an outer lever pin (13a) fixed to an end portion of the outer lever, a connecting member (21) rotatably attached to the outer lever pin, a shift cable (20) an end of which is connected to the connecting member via a guide member (23) secured to the housing, a bearing member (26) having a lower degree of frictional coefficient, and the connecting member being connected to the outer lever pin through the bearing member so as to be movable in the axis line direction corresponding to an amount of a travel distance of the shift and select shaft in the axis line direction.
