Abstract (en)
The system has a control station with a data medium (12) having an identification, and a center (20) to recognize the identification of the medium that is read and stored by a data collector (14). The collector has a communications interface with a transceiver (40) in high frequency (HF), ultra high frequency (UHF) or super high frequency (SHF) range. The interface is a Bluetooth interface and has an external transceiver which is in the HF, UHF or SHF range, is a Bluetooth transceiver and is permanently or temporarily connected with the center directly or through a network or a radio network.
