Abstract (en)
[origin: EP1791102A1] The holder (1) has a supporting leg (2), and a rear wall (3) provided for fitting a placard. Retaining bars (6a-6d) are arranged along upper and lower edges of the rear wall, and profile bars form base parts of the retaining bars, where the lower edge of the rear wall projects downwardly. The retaining bars comprise a front part that is connected with the base parts by using a hinge. Bar-shaped hinge parts are arranged at the profile bars and lie only in the area of the rear wall, and a lower section of the profile bars is free from the hinge parts.
