Abstract (en)  
[origin: EP1791216A2] The adapter has a clamping device (3`) with a terminal contact in which a conductor end is fixed. The contact is electrically connected with the conductor end. A plug (2`) is formed and detachably inserted in a connecting terminal. A plug contact is electrically connected with the connecting terminal, in the inserted condition of plug. The adapter forms a detachable and separately arranged component at a switching component. An independent claim is also included for a method for wiring an electrical switching component.
