Abstract (en)

[origin: WO2006032257A1] The invention relates to a self-service product detection station (10) comprising a scanning device (14) for bar-coded labels and a conveyor scale (18) which is arranged behind the scanning device (14), in the direction of transportation of the goods (W), in addition to several places of deposit (38, 40) for the scanned goods. The places of deposit (38, 40) are arranged successively in a row, once again in the direction of transportation (W) and can be separated from the respective place of deposit by an adjustable barrier (44).
