Abstract (en)

[origin: WO2005099529A1] The invention concerns a synthetic sheath used as an aid for pulling socks, in particular compression socks, on and off. The very thin low-friction, tear-proof synthetic sheath consists of a sock part (11) for pulling off and of a tongue part (12) for pulling on and after use can be folded such that it is only the size of two matchbooks placed side by side.
