Abstract (en)
[origin: WO2006029908A1] This invention relates to plasmid DNA liquid formulations that are stable and stays un-degraded at +4 °C to room temperature for long periods of time, and are thus useful for storage of plasmid DNA that are used research, plasmid-based therapy, such as DNA vaccine and gene therapy. The present invention also relates to a method of preserving plasmid DNA in a stable form over time at +4 °C to room temperature. The present invention also relates to stable plasmid DNA liquid compositions for use in a method of treatment of the human or animal body by plasmid-based therapy, such as DNA vaccination or gene therapy.
