Abstract (en)

[origin: WO2006032333A1] The invention relates to a method for charging a fibre material suspension, which contains cellulose fibres, with calcium carbonate, said method consisting of the following steps: calcium hydroxide in a liquid or dry form or calcium oxide is introduced into the fibre material suspension, carbon dioxide is introduced into the fibre material suspension, calcium carbonate is precipitated from the calcium hydroxide by the carbon dioxide in a pressurised pressure container (2).
