Abstract (en)
[origin: WO2006029758A1] The invention relates to a portable device (2), for clearing access into or via a computer network (4). A terminal (1) is at least temporarily connected to the computer network (4). Functionalities are implemented in the portable device (2), for connecting the portable device (2) in a communication path between the terminal (1) and the computer network (4), for the authentication of a user and for the preparation of access data for clearing access.
