Abstract (en)
[origin: WO2006032375A2] The invention relates to a method for the layout and checking of value documents. According to said method for the layout and checking of value documents, in particular, banknotes, a design for a value document is generated by means of CAD, comprising several features described by the CAD data for the value document design, whereby the CAD data for the design of the value document is checked for suitability of the features in the design for an automatic checking.
