Abstract (en)
[origin: EP1792695A1] Some files (1) are fitted with several holding rings (2) positioned at a distance from each other and requiring a sheet with complementary arranged holes. The new design of a punch (3) comprises several hole punching elements (5) to be slid along a transversal rail (4) in order to be adjusted to the position of the rings (2). A set of marking elements (7) is held at a removable rail (6) and can be compared and adjusted to the particular position at the file (1) and reinstalled for aligning the punching elements (5).
