Abstract (en)
[origin: EP1793360A2] The device has a stationary counter bearing (9) formed on a base element (1) and a retainer profile (8) arranged opposite the counter bearing. The counter bearing has a connection receiving portion formed open against clamping direction. The retainer profile has extended connection portions inserted into the connection receiving portion, and connecting portions (12,12') placed on the supporting surface of the counter bearing.
