Abstract (en)
[origin: EP1793371A2] The method involves providing a database including information for a set of streets, where the streets are characterized by respective street names and street types. A voice input including a street name information and a street type information is provided by a user. A given street type is recognized by processing the voice input. Streets having the given street type are selected from the database. A street name of one of the streets selected from the database is recognized by processing the voice input. An independent claim is also included for a method for finding information in a database.
