Abstract (en)

[origin: WO2006027526A1] The invention relates to a support device (1; 50) which is used to support a drinks container and which is intended to be fixed to a chair (2) comprising a seat (7), a front leg (3) and, optionally, an armrest (4). The inventive device is designed to be fixed to at least one of the following: the seat (7), close to the front edge thereof; the front leg (3); and the optional armrest (4) below the part (5) on which the arm rests. The device is characterised in that it comprises a tray (16) which is designed to receive objects and in that device is designed to be fixed to the chair such that the tray (16) is essentially at the height of the seat (7).
