Abstract (en)
[origin: WO2006030086A1] The invention relates to a device (1) comprising a container (2) for bottles (3), in which the container (2) is equipped with an opening (7) and a base (8). The inventive device (1) also comprises a support (4) which is designed to fix the container (2) to the edge (6) of a table (5) and which is equipped with a base (10). The support (4) and the container (2) comprise means (17, 18, 31) which are intended to be solidly connected between: (i) a first position in which the base (10) of the support (4) is disposed at the opening (7) of the container (2) and in which the support (4) is intended to fix the device (1) to the edge (6) of a table (5), such that the opening (7) of the container (2) is oriented upwards; and (ii) a second position in which the base of the support is disposed at the base of the container and is intended to be placed on the table, such as to support the container in a stable manner.
