Abstract (en)

[origin: US8052071B2] The invention relates to a fluid reservoir for a paint spray gun, comprising a cup-shaped receptacle (1), a lid (2) that can be placed thereon (1) and a connecting part (3) which can be formed on the receptacle (1) or on the cover (2) and which is used to secure the fluid reservoir to the paint spray gun. According to the invention, a transition area (12) between the connecting part (3) and the receptacle (1) or the cover is embodied in a flexible manner in order to adjust the inclination of the receptacle (1) or the cover (2) in relation to the central axis (14) of the connecting part (3) in order to improve material guiding, even when the paint spray gun is inclined positions.
