Abstract (en)

[origin: WO2006032821A1] The invention concerns a device for protection (20) against impacts on a common injection manifold (11) mounted on an internal combustion engine, the device being fixed on a component (1) of the engine, and consisting of a metal reinforcement (30) whereof at least two columns (31) dimensioned for impact resistance are proximate to the manifold (11), characterized in that it comprises means for fixing another component on the device.
