Abstract (en)

[origin: WO2006025005A2] The present invention relates to an imaging system for displaying image data representative of a structure of temporally changing configuration. The imaging system comprises display rendering means for processing data representative of the changing configuration of the structure and rendering a display comprising a reference image of the structure in a preselected configuration and superposing with the reference image a changing image of the structure which changes in configuration with respect to time.
