Abstract (en)
[origin: WO2006034803A1] The invention relates to an electrical switch (1) having a housing (2) and a contact system housed in said housing (2). An actuator (5) projects from the housing (2) on a first end (3) and acts upon the contact system for the purpose of switching. Electrical connections (6) for the contact system project from the housing (2) on the opposite second end (4). Said connections (6) are bent to such a degree that the connections (6) reach from the second end (4) to approximately the first end (3).
