Abstract (en)

[origin: WO2006035003A1] The invention relates to a method for updating a radio-based communications device (MS), according to which update data (u1, u2) is downloaded from a network device to the communications device (MS). The invention is characterised in that the download (S3, S4; S4*) and/or installation (S6) of the update data (u1, u2) is autonomously controlled and executed by the radio-based communications device (MS).
