Abstract (en)

The transmission arrangement (1) is arranged along the moving path (20) of a gripper used in a bend-processing machine. The path is formed for the swiveling motion of the gripper from one swiveling point (12) of a rocker (13) and back to the swiveling point along a swiveling path (18). A control bar (7) is provided for performing the swiveling motion with respect to a stationary fixed point (9). The moving path is formed in circular shape.
