Abstract (en)

Sealing paste is in the form of a mineral fiber matrix and consists of a layer material, water, fillers, compounds and a plant oil. Preferred Features: The base materials in the matrix are present in a mixing ration of 5-22 wt.% layer material, 50-80 wt.% water, 0-10 wt.% plant oil, 5-48 wt.% fillers and 0-18 wt.% compounds. The layer material is bentonite. The fillers are selected from natural fiber products, preferably natural cellulose with a toothed surface and a fiber length of 0-15 mm, preferably 2 mm. Carboxymethylcellulose and/or starches are bound in the compounds as stabilizers.
