Abstract (en)

Apparatus for conditioning of organic materials comprising supplying channel (6) connected with an inlet gate (1a) leading to a spreader (2) placed in a conditioning chamber (8). The conditioning chamber (8) is connected with an outlet gate (1b). Further the conditioning chamber (8) is provided with channels (4 , 5) supplying thermodynamic medium, the conditioning chamber (8) comprises a set of nozzles (10) giving to the thermodynamic medium angular motion, further conditioning chamber (8) comprises an outlet (3) discharging thermodynamic medium outside the apparatus.
