Abstract (en)

Plastic drum (01) comprises a plastic sounding body (03) and a plastic membrane (02) formed as one piece with the sounding body. The membrane is tensioned by an outwardly directed bulge against the striking direction. Preferred Features: The sounding body comprises a lower part and an upper part joined by a seam. The upper part is formed along a closed peripheral line in one piece with the membrane. The sounding body is cylindrical. Holding straps (04) are arranged diametrically in the sounding body.
