Abstract (en)  
[origin: EP1623651A1] A process for producing an applicator (12) with a holding section (18) and an applicator section (30), comprises injection moulding the applicator onto the holding section using an injection moulding machine. The applicator consists of plastic while the holder consists of a harder material. A mixed layer (32) is formed between the applicator and the holder. The moulding takes place at 60-80oC. The applicator consists of silicone rubber while the holder consists of a thermoplastic, eg polyethylene, polypropylene, PVC, polyacetate, polyacetal, polystyrol or polyamide.
