Abstract (en)
[origin: WO2006018520A1] The invention relates to a storage assembly of the type that comprises at least two modules (1) which can be solidly connected to one another, each of said modules being equipped with means for accessing at least one storage space, closure means (3, 6, 8, 12) and means (10) for solidly connecting the modules to one another. The inventive assembly is characterised in that at least one module comprises means for locking (i) the means for solidly connecting the modules to one another and (ii) the closure means for closing off access to at least one module.
