Abstract (en)

[origin: WO2006042570A1] The invention relates to a method for using a sterile product preparation for surgical instruments (4) or sterile product units (1) of any type during which surgical instruments (4) or sterile product units (1) of the most varied type and origin are fed to a sterile product processing system (5). The aim of the invention is to provide each surgical instrument (5) or each sterile product unit (1) with a transponder (6) in order to assign the surgical instrument (4), after having been treated in the sterile product processing system (5), to a specified user.
