Abstract (en)
[origin: WO2006021695A1] The invention concerns an implantable device (1) for injecting and/or drawing fluid comprising a housing (2) wherein is provided a chamber (2A), the housing (2) including a proximal wall (4) and a distal wall (5) between which extends a side wall, said housing (2) including an aspiration zone (7) designed to be perforated by a hollow needle for injecting and/or drawing fluid in the chamber (2A). The invention is characterized in that said aspiration zone (7) is configured to extend simultaneously on the proximal wall (4), the side wall and the distal wall (5), said device (1) comprising a shield (13) made of a material not perforable by the hollow needle arranged inside the chamber (2A), so as to prevent the housing (2) from being perforated through and through upon the perforation produced by hollow needle.
