Abstract (en)
[origin: US2006072857A1] A waterproof carrying case formed from a soft flexible material using dielectric welding. A main body of the bag carries a interlocking closure member fused in the open top and sealed against the main body by a pair of end sleeves positioned over a corner of the main body and the closure member. A pair of opening loop handles is secured to the main body adjacent the closure member. By pulling on the loop handles, a user can open tightly closed interlocking closure.
