Abstract (en)

[origin: WO2006037571A1] The invention relates to a method for producing strips from a film web, in addition to a device for carrying out said method. According to said method, a polymer melt is extruded to form a film web, cooled and drawn and the film web is then divided into a group of strips comprising a plurality of strips. Prior to the drawing process, the group of strips is separated into several groups of strips and drawn separately. To achieve this, a drawing device comprising several separate drawing frames is provided, said frames drawing the strips individually after the division of the group of strips.
