Abstract (en)  
[origin: WO2006039959A1] The invention relates to an ejector for generating a vacuum, comprising an intake air duct, a compressed air duct, a vacuum sensor that is connected to the intake air duct, a bistable valve unit which seals the compressed air duct, and a controller that controls the valve unit. The controller and/or the valve unit are/is provided with an energy accumulator which supplies the same with electric power.
