Abstract (en)
[origin: WO2006032642A1] The invention relates to a refrigerator, comprising a body, provided with a door opening, an inner container (1), an outer wall and a cavity filled with insulation material between the outer wall and the inner chamber (1), in which a drain line (7,10,15) for water runs from a lowest point of the base (5) of the inner chamber (1), through the cavity, into the open. A line section (15) of the drain line which may be pulled out of the body, runs through a tube (10) embedded in the insulation material and sealed against the same.
