Abstract (en)

[origin: WO2006034915A1] The invention relates to an antenna housing, especially for a vehicle antenna for mobile telecommunication, which comprises a base (10) facing a mounting surface and a cap (11). The inventive antenna housing is characterized in that the cap (10) at least partially encloses the base (11). The invention also relates to a method for producing an antenna housing, especially for a vehicle antenna for mobile telecommunication, which comprises a base (10) facing a mounting surface and a cap (11) enclosing the same when mounted. According to the inventive method, the base (10) and the cap (11) are produced in two separate injection molding process steps.
