Abstract (en)

[origin: WO2006030056A1] The invention relates to a technique for expanding a bandwidth between a mobile (304) and base (302) station. Especially the invention relates to a method, arrangement, mobile station and base station for expanding a WCDMA bandwidth (306) between the mobile and base station, where the WCDMA bandwidth is expanded with a second radio link (310) established between the mobile and base station using the unlicensed spectrum.
