Abstract (en)

[origin: EP1797958A1] A general purpose table (1) has an arrangement for supplying and/or generating at least one utility service (26) controlled by at least one device (24), and which is temporarily fixed to the table by a fixing device (3), so that storage e.g. of a gas cylinder, or utility providing equipment e.g. a vacuum pump, is located below the table work-top. The fixing device may be suction cups, clamps or bolts. Independent claims are also included for the following: (i) an assembly able to provide at least one utility/ medium to a workbench, by having a unit which is secured by a first fixing device (3) to the bench via a second fixing component (32) which attaches to the table, without causing disruption or damage to the bench; and (ii) for a system of providing utilities which is attached to a table by a single fixing (3).
