Abstract (en)

[origin: EP1798151A1] The packaging covers a body at four sides, and has a front wall (11), a rear wall (12) as well as an upper (13) and a lower front wall (14). An inner wall surface (12a) of the two walls has a product catch (20) which is provided in the opening of the packaging roll. One of the two walls of the packaging is double-walled, where an external wall (15) of the double-wall is linked in or reciprocally around the catch and provides a hinged out wall section (15a). An independent claim is included for a folding cut for a packaging material roll.
