Abstract (en)

The present invention relates to a pouch comprising a packaging material formed into said pouch by wrapping said packaging material and joining two opposing edges (4) 3 forming a tube with open ends, being closed in a second sealing portion (6) and a third sealing portion (6) by flat-laying and joining opposing packaging material portions at respective ends. The pouch comprises an outer (8) and an inner (7) layer of sheet material only partially joined to each other, wherein the inner and outer layers are at least intermittently joined to each other at an attaching portion (2) extending from the second sealing portion to the third sealing portion. The invention further relates to a web of packaging material for forming pouches, to a method for producing a web of packaging material, and to a method for filling and sealing a pouch.
