Abstract (en)

[origin: EP1798365A2] Fixing device comprises a support unit consisting of a tensioning rod to be placed in the bent state between the interacting surfaces (7) and a support profile (21) for holding the tensioning rod in the interacting surfaces. Preferred Features: The interacting surfaces are arranged on bearing pieces separate from the support unit. An intermediate piece (11) is also provided opposite the tensioning rod to stop in different positions in the longitudinal direction. The tensioning rod is made from PVC or ASA.
