Abstract (en)

[origin: WO2006032783A2] The invention concerns a piece of jewellery, comprising at least two elements, wherein said elements (1, 2, 3) are linked together by hinge means consisting of at least one single pin ball (4) interposed between at least two elements (1, 2), at least one of the two including an inner spherical seat (5) corresponding to the pin ball (4). The invention is characterized that the pin ball (4) is mounted in such a way in the inner spherical seat (5) that it allows each element (1 or 2) to pivot relative to the other (2 or 1) in all directions.
