Abstract (en)
[origin: WO2006040224A1] A set consisting of several pairs of rings (1, 2), wherein each ring has a single raised pattern (11, 21) enabling it to fit together with one other ring of the set. The raised pattern is, for example, arranged on the edge (10, 20) of each ring. The ring is mounted on an adaptation ring (3, 4) so that it can be adapted to the diameter of the wearer's finger. The individual ring pairs are manufactured with the aid of a cutting program on a digitally controlled machine.
