Abstract (en)

[origin: WO2006039969A1] The invention relates to a kit (1) which is used to create an office work space, particularly for several people, comprising at least one table-top (2) which is detachably arranged on a carrier frame, wherein said carrier frame is formed by longitudinal cross beams (4) and bridges (5) which are arranged perpendicular thereto and provided with table legs (6). The aim of the invention is to provide a maximum amount of scope for variation vis à vis the fitting of the respective work stations on the work surfaces and on additional elements. This aim is achieved by fitting at least the edge of the table-top (2) facing away from the user with a multifunctional profile (3) for receiving devices and fittings associated with the work station.
