Abstract (en)

[origin: WO2006037943A1] This invention provides a tree stand comprising a tree retaining member (16) arranged in use to releasably mount a tree, the tree retaining member (16) comprising tree gripping means (14) comprising a resilient member moveable between a first position in which the gripping means (14) are arranged to grip a tree mounted in the tree stand, and a second position in which the gripping means (14) are arranged to enable release of a mounted tree, wherein the tree stand further comprises a means to releasably lock the gripping means in the first position (22). The invention further provides a kit comprising a tree stand of any one of claims 1 to 9 and a tree.
