Abstract (en)

[origin: WO2006037425A1] The invention relates to a non-reclosable packaging (10) for products that are hazardous to health, particularly pharmaceutical products, comprising a first packaging material element (1) and a second packaging material element (2), both packaging material elements (1, 2) situated one above the other. The packaging (10) has at least one planar section (11) on whose edge or edges (21) both packaging material elements (1, 2) are detachably joined to one another. At least one cavity (4), which is closed on all sides while serving to accommodate the packaged good (5), is formed between both packaging material elements. The packaging has at least one second planar section (12) that is located outside of said first planar section (11) or is adjoined thereto, and both packaging material elements (1, 2) are detachably joined to one another on the edge or edges (22) of the second planar section. At least one of the two packaging material elements (1, 2) is provided with at least one structure (3), which extends inside the second planar section (12) and which enables the packaging material element(s) to be torn.
