Abstract (en)

[origin: WO2006039829A1] The invention concerns a method for fixing a lining strip (10) on a base surface of a lid stem (1) using at least one lining clip (20; 120; 120') having a first terminal section (21; 121; 121') designed to be fixed to the lid bar (1) and a second terminal section (22; 122; 122') designed to be fixed to the lining strip (10). The inventive method is characterized in that a central section (23; 123; 123') arranged between the first and the second terminal sections (21, 22; 121, 122; 121', 122'), is deformed immediately before or after the lining clip (20; 120; 120') has been fixed to the lid bar. The invention also concerns such a lining clip (20; 120; 120') and a corresponding compression tool (30).
