Abstract (en)
[origin: WO2006040143A1] The invention relates to a device for constructing a road or the like. In order to make it possible to easily construct a road with a defined road profile, a road finisher (1) having a pusher blade (2, 3) is provided, which is mounted at a working angle (13) of less than or equal to 90 degrees to the working direction (5), and which is designed for bringing in material (39) used for constructing the road (37) or the like. A ground processing device (8) for laterally removing material (38) not used for constructing the road (37) or the like is mounted on the front end (7) of the road finisher.
