Abstract (en)

[origin: WO2006040072A2] The invention relates to a frame for a door, a window or the like façade element, which is configured as a fixed frame or casement frame (1, 3) and which comprises a frame profile (6, 6', 46, 49, 52) supporting at least two attachable profiles (7, 7', 13, 13', 27, 27', 29, 34), one of which is arranged on the interior and the other on the exterior. At least the exterior attachable profile (7, 7', 27, 27', 47) can be fixed on the frame profile (6, 6', 46, 49, 52) in a displaceable manner so as to compensate for the effects of thermal expansion and contraction, and removed therefrom.
