Abstract (en)
[origin: WO2006039891A1] Disclosed is an air-conditioning compressor for air conditioners, especially for motor vehicles, or an air conditioner comprising an air-conditioning compressor. Said air-conditioning compressor is connected to a high-pressure zone and a suction pressure zone. Driving chamber pressure is redirected from the driving chamber of the air-conditioning compressor, i.e. from the high-pressure zone of the driving chamber to the suction pressure zone, if necessary while a filter, particularly a dirt particle filter, is optionally placed in the suction pressure zone.
